IMPORTANT NOTES: Some Hydrologic Unit naming convention for planning areas in this table is outdated due to the age of some stakeholder written watershed plans. Revisions are anticipated as stakeholders update their plans. The accompanying maps in this 2011 RFP package approximate the area covered by the existing plans. Specific implementation areas for your proposed projects should be derived from information provided in the existing nine-element watershed plans, which can be found at http://dnr.mo.gov/env/wpp/nps/319applicationresourcetools.htm . Funding preference will be provided to projects having an EPA approved TMDL in addition to the accepted watershed plan. http://dnr.mo.gov/env/wpp/tmdl/wpc-tmdl-EPA-Appr.htm .
